

POPULATION CHANGE and VARIANCE from IDEAL - ADJUSTED 2020 CENSUS POPULATION COUNTS by EXISTING 2012 CONGRESSIONAL DISTRICT

Note: This report is based on Census 2020 P.L. 94-171 Redistricting Data (Maryland) and is **ADJUSTED** for the use of Maryland Redistricting pursuant to the "No Representation Without Population Act" (SB 400\HB 496) signed into Maryland law in 2010. Maryland census data **must be ADJUSTED** for the purposes of creating congressional, state legislative, and local districting plans. Generally, the law requires that the census data must be adjusted to reassign Maryland residents in State & Federal correctional institutions to their last known address, and to exclude out-of-state residents in correctional institutions from redistricting.

Variance from Ideal District Population
Ideal Congressional District Population 2010: 721,529
Ideal Congressional District Unadjusted Population 2020: 772,153
Ideal Congressional District Adjusted Population 2020: 771,925

Congressional District	Adjusted Total Census Population 2010	2010 Adjusted Ideal Congressional District Population	Unadjusted Total Census Population 2020	Adjusted Total Census Population 2020	2020 Adjusted Ideal Congressional District Population	Net Change		Adjusted Variance from Ideal Population

Definition: The "ideal" district population is equal to the total state population divided by the total number of districts. "Absolute deviation" is the degree by which a single district's population varies from the "ideal" population. This difference is expressed as a plus or minus number, meaning that the district's population exceeds or falls short of the "ideal" by that number of people. The percent deviation is the percent, plus or minus, that the district's actual population deviates from the "ideal" population.

Note: The district totals include minor corrections in the assignment of census tabulation blocks to voting districts/precincts. The corrections to the P.L.94-171 U.S. Bureau of the Census file were made by Maryland Department of Planning and Department of Legislative Services.

The 2020 Population for Congressional and Legislative Districts are derived and based on the assignment of voting district/precincts to each district as provided by Local Board of Elections and adjusted by the Maryland Departments of Planning, Legislative Services and Public Safety and Correctional Services pursuant to the "No Representation Without Population Act."
